Statistical methods used in sampling and analysis - the Permittees shall require that generator/storage sites use the methods for statistically selecting retrievably stored and newly-generated TRU mixed waste containers for visual examination and volatile organic compounds (**VOCs**), semivolatile organic compounds (**SVOCs**), and total metals analysis, establishing upper confidence limits, and, when demonstrated appropriate, control charting for newly-generated waste stream sampling specified in Permit Attachment B2 (Statistical Methods Used in Sampling and Analysis).
- II.C.1.d. Quality assurance objectives - the Permittees shall require that all waste characterization activities used by generator/storage sites comply with the appropriate quality assurance objectives (**QAOs**) specified in Permit Attachment B3 (Quality Assurance Objectives and Data Validation Techniques for Waste Characterization Sampling and Analytical Methods). The Permittees shall require generator/storage sites to review, validate, and verify all analytical data; reconcile analytical results with data quality objectives (**DQOs**); satisfy data reporting requirements; and identify, document, and report all nonconformances and

operational variances in compliance with Permit Attachment B3.

- II.C.1.e. Acceptable knowledge - the Permittees shall require generator/storage sites to assemble acceptable knowledge documentation and confirm acceptable knowledge determinations, and shall audit (as specified in Permit Condition [II.C.2](#)) all aspects of the acceptable knowledge waste characterization process as specified in Permit Attachment B4 (TRU Mixed Waste Characterization Using Acceptable Knowledge).
- II.C.1.f. Quality assurance - the Permittees shall require each generator/storage site to develop and implement a quality assurance project plan (**QAPjP**) which demonstrates compliance with, and implementation of, applicable requirements of the WAP, Permit Attachment B, as specified in Permit Attachment B5 (Quality Assurance Project Plan Requirements).
- II.C.1.g. WIPP Waste Information System (WWIS) database - the Permittees shall provide the Secretary access to the WWIS database as necessary to determine compliance with the WAP. The WWIS shall meet all requirements presented in Section B-4b(1)(i) of the WAP, Permit Attachment B, prior to acceptance of TRU mixed waste. The Secretary's access to the WWIS shall be direct, read-only (via modem or Internet) to all query and reporting functions of the Characterization, Certification, Shipping, and Inventory modules of the WWIS database.

II.C.2. Audit and Surveillance Program

The Permittees shall not manage, store, or dispose TRU mixed waste at WIPP from a generator/storage site until the following conditions have been met as necessary for the Secretary to determine that the characterization requirements of Permit Condition [II.C.1](#) have been implemented:

- II.C.2.a. Requirement to audit - the Permittees shall demonstrate to the Secretary that the generator/storage sites have implemented and comply with applicable requirements of the WAP by conducting an audit of the generator/storage sites as specified in Permit Attachment B, Section B-4b(1)(iii), and Permit Attachment B6 (Waste Isolation Pilot Plant Permittees' Audit and

Surveillance Program), and as required by 20.4.1.500 NMAC (incorporating 40 CFR §264.13).
