

CERILLOS BANK STABILIZATION PROJECT

Location and Directions: North of the Village of Cerillos on Road to the Cerillos Hills State Park. From NM 14, turn west on Main Street, then turn north (right) on First Street (County Rd, 59) and cross the railroad tracks. This is the road to Cerillos Hills State Park. The project is on the arroyo approximately 0.3 miles from the tracks at approximately 35 ° 26' 25" N 106 ° 07' 15"W. See Google Earth map enclosed.

Approximate Date of Construction: 2004

Number of bales / tires used: Approximately 250 bales

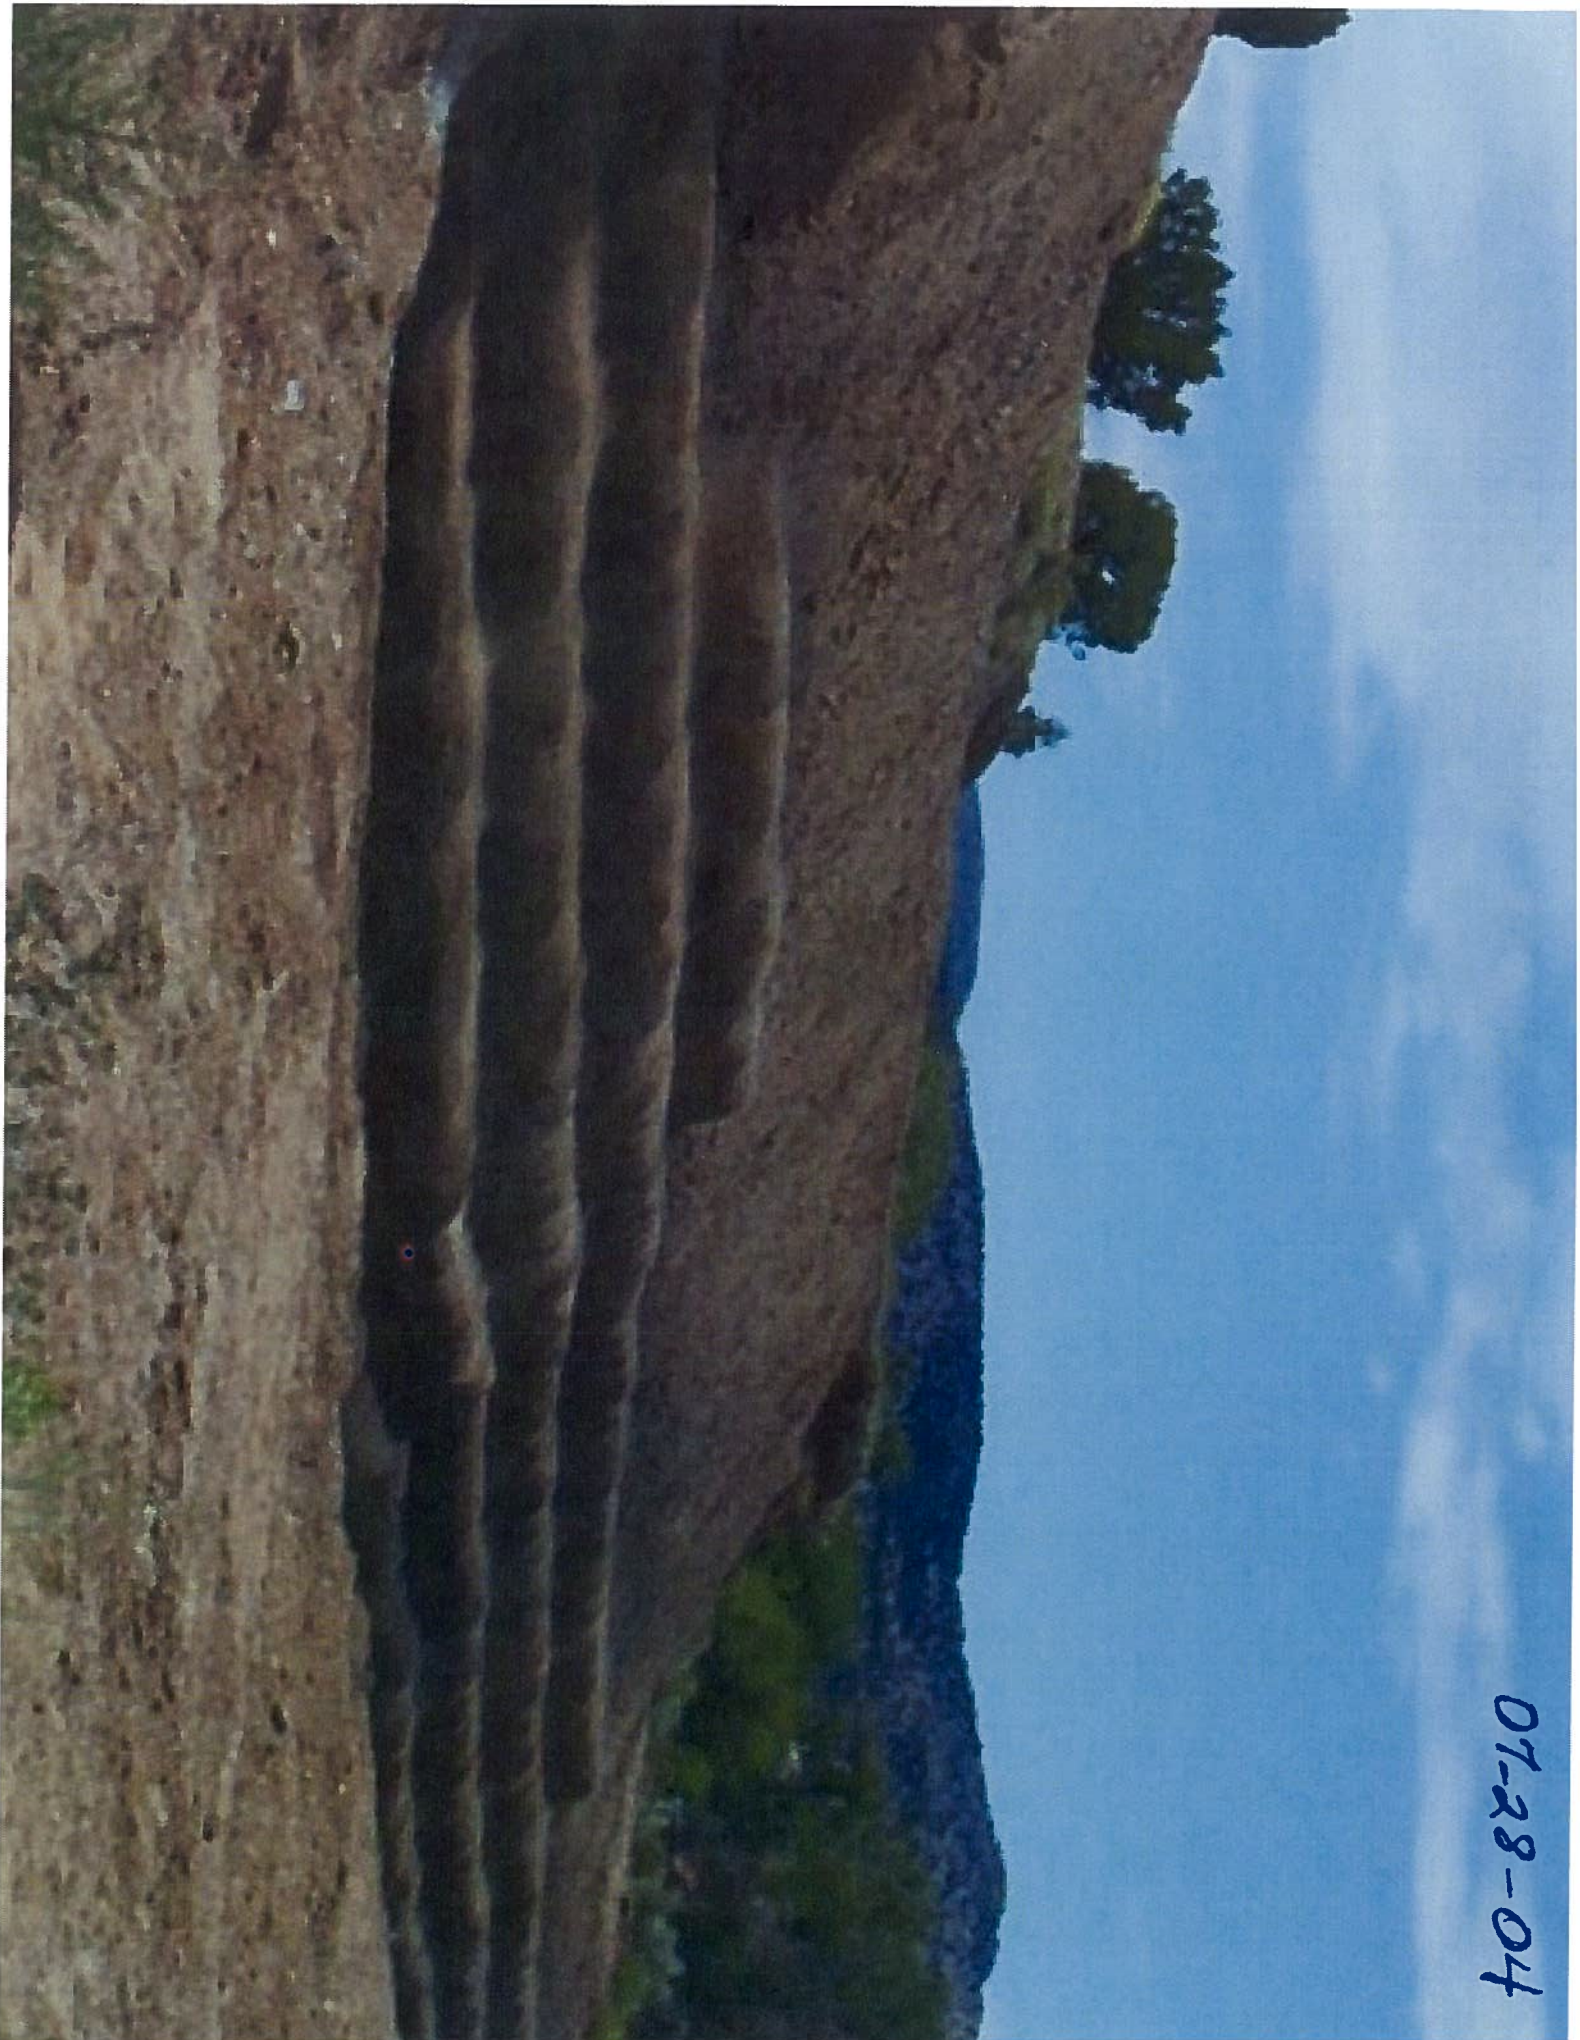

Design and other information The structure was built to prevent migration of waste from an unpermitted landfill into the adjacent arroyo. The design was similar to that used for the Agua Fria Landfill Closure project. Two rows of bales were placed under the surface. Bales were covered with shotcrete.

Cost Unknown

Other Information: A site visit in July 2011 showed very little cracking / deterioration.
